

Dear colleagues and friends,

Welcome to "Munich Rhinoplasty 2016"!

For many facial plastic surgery specialists rhinoplasty is the most fascinating and challenging topic in the field. To master all aspects of nasal surgery, every facial plastic surgeon needs to seek a profound education consisting of both theoretical knowledge and practical training. This meeting offers a complete description of rhinoplasty procedures within three days, including live surgery and a hands-on training course with cadaver heads or plastic training model, under guidance of the experts. You will observe the operations through video transmission in the lecture hall, using advanced up-to-date TV technology.

I am proud and happy to present at my side Dr. Hossam Foda, an extremely renowned and respected international teacher and expert in nasal surgery.

Prof. Dr. Alexander Berghaus
