

**Dissections**

**Anatomic dissections (Apr 9 and 10)**

On April 9 a full day anatomic workshop surgical rejuvenation is offered. The participants will be taken through the key procedures of surgical rejuvenation, including face lift, endoscopic brow lift and endoscopic midface lift. On April 10 a full day anatomic workshop rhinoplasty is offered. The participants will be guided through the key approaches and maneuvers in rhinoplasty. Two participants share one fresh frozen cadaveric head with fully preserved nose for both workshops.

**Workshop auricular reconstruction (Apr 9 and 10)**

A full day workshop auricular reconstruction is offered on April 9 and 10 (both are identical). Ralph Magritz, one of the world's leading experts, will teach a limited number of participants the carving of an auricular framework. A special model of synthetic material resembling rib cartilage is utilized.

**Workshop hair transplantation (Apr 10)**

An introductory workshop hair transplantation is offered on Apr 10. Grafting is practiced on cadaveric heads. Three global experts, Bessam Farjo, Nilofer Farjo and Sam Lam will take the participants through the basic maneuvers. This is intended for surgeons who want to start with HT. The introductory lectures will take place on April 9.

The Finesse Lecture:  
"Facial Transplantation"

**Directors:** H.G. Gassner, K.D. Boahene  
**Program chairs:** T. Kühnel, T. Reichert, L. Prantl  
**University of Regensburg, Dept. of Otolaryngology Chair:** J. Strutz

In cooperation with the departments of:  
Anatomy (Chair: E. Tamm), Plastic Surgery (Chair: L. Prantl) and Maxillofacial Surgery (Chair: T. Reichert)

In cooperation with Johns Hopkins Medical Center

## Finesse in Facial Plastic Surgery – The Regensburg Course 2016 – Under the auspices of EAFPS

### Dear Colleagues and Friends:

Finesse in Facial Plastic Surgery, 2016 in its 7th consecutive year will be organized in cooperation with Johns Hopkins Medical Center. We are proud to welcome you to world class training in a spectacular environment. As a result of your feedback, we are including more coverage of endonasal rhinoplasty techniques, revisional rhinoplasty, and nasal reconstruction; expert panels have been expanded to cover facial reconstruction and facial rejuvenation; a 90 minute video session on surgical techniques is introduced.

The course program is specifically designed to teach facial plastic surgery techniques in a structured, step-wise manner. Outstanding faculty from around the world will train you in:

- Modern concepts in rhinoplasty surgery:  
A balanced coverage of endonasal and open techniques, basic and advanced septoplasty, difficult and revisional techniques.
- The latest advances in reconstructive surgery:  
Nasal reconstruction, facial reanimation, auricular reconstruction, the "Finesse Lecture" Facial Transplantation.
- Expert techniques in facial reanimation:  
Reliable solutions with long term follow-up, presented by seasoned experts.

The lecture series (Apr 6 - 10) features presentations, surgical videos, live transmissions of procedures direct from the operating room and a key note lecture on facial transplantation. Two full days of dissections on fresh anatomic specimen and the workshops auricular reconstruction and hair transplantation are offered on April 9 - 10. **Early registration is recommended.**

**Discounts** available for residents, EAFPS and PAAFPS members, and participants from guest country India. For registration, please visit

Regensburg, is one of Germany's most wonderful medieval towns, relaxing yet vibrant. The town is located close to Munich. Travel is easy to Munich airport, and hotel accommodation is affordable. Please let us welcome you to "Finesse in Facial Plastic Surgery 2016" and to the charming beauty of our city, a UNESCO world cultural heritage.
