Course description

Over the past two decades, there has been a huge evolution in the way in which septal perforation with endoscopic techniques are approached and managed. This course represents a current state of the art in septal perforation repair. During one complete day, an update will be presented by our faculties on anatomy, blood supply, pedicle septal flaps, and lateral wall pedicle flaps. Another hand-on day, where delegates will practice all different approaches to repair septal perforation under our supervision. **For those attending complete course**, the Thieme book on “Nasoseptal perforation” will be delivered for free to each delegate. Complete specimen (both nasal cavities) will be available for each delegate.

Course objectives

The course objectives are:

- To review the endoscopic anatomy of the nose and sinuses.
- To review the blood supply of nasal septum and lateral nasal wall.
- To provide the opportunity to improve the skills handling endoscopes and instruments in the nose and to learn, step-by-step, the endoscopic surgery of the nasal cavity and sinuses.
- To harvest all kind of intranasal pedicled flaps.
- To learn decision-making in the management of septal perforation repair.
- A stepwise surgical approach to repair septal defects in FRESH cadaver.

Registration:

1st Septal perforation repair. Theoretical course

Theoretical only (Sep 16) 330€

1st Septal perforation repair. Hands-on course

Hands-on (Sep 17) 2500€

Theoretical part:

Monday 16/09/2024

07:45 Registration theoretical part

08:15 Welcome and introduction (**Alobid**)

Moderator: **Bernal**

08:30 Overview of anatomy of the nose and paranasal sinuses (**Harvey**)

09:00 Radiology of the nose and sinuses (**Garaycochea**)

09:30 Nose and sinuses blood supply (**Gras**)

10:00 Cocaine, nose picking and identifying conditions associate with perforations (**Harvey**)

10:30 Coffee break

Moderator: **Alobid**

11:00 Non-surgical treatment (**López**)

11:30 Anterior ethmoidal artery flap (**Castelnuovo**)

12:00 Greater palatine artery flap (**Mariño**)

12:30 Lateral wall flap (**Rodriguez**)

13:00 Course photo (**Delegates and Faculty**)

13:10 Lunch

Moderator: **Bernal**

14:00 Nasal floor and inferior meatus flap (**Rojas**)

14:30 Bilateral nasoseptal flaps (**Morera**)

15:00 Posterior septal advancement (**Moreno**)

15:30 Pericranial flap (**Santamaria**)

16:00 Septal perforation and rhinoplasty (**Rusetsky**)

16:30 Coffee break

Moderator: **Alobid**

17:00 Nasal reconstruction (**Guilemany**)

17:30 Quality life and septal perforation (**Alobid**)

18:00 Round table 1: case discussion (**simple cases**)

Moderator: **Alobid**

Panelists: **Castelnuovo, Harvey, Rusetsky**

19:00 Round table 2: case discussion (**challenging cases**)

Moderator: **Alobid**

Panelists: **Castelnuovo, Harvey, Rusetsky**

20:00 Discussion

21:00 **Gala Dinner (Registration)**

Practical part (fresh cadaver dissection):

Tuesday 16/09/2024

Hand on dissection

09:00-13:00 Hand on dissection

13:00-14:00 Lunch

14:00-18:00 Hand on dissection
